Open House for Liberty High School Sustainability CTE Facilities

Hillsboro School District invites the community to tour Liberty High School's new facilities supporting sustainable agriculture/design career-technical education

May 22, 2023, Hillsboro, OR - An informal open house will be held to enable the community to view and tour facilities recently constructed to support Liberty High School's sustainable agriculture/design career-technical education program. Seniors will present their capstone projects for the program.

Made possible by the 2017 Hillsboro School District Bond, two facilities were constructed at the north end of Liberty's campus: a sustainable agriculture/design building comprising classrooms and workshops; and a solar array canopy that will enable students to monitor and study photovoltaic power generation. Completed for \$3.68 million in January 2020 and \$1.97 million in May 2023, respectively, these facilities provide students with opportunities to study and apply environmentally-sustainable practices and technologies that can lead them into related post-secondary education and careers. (COVID restrictions had prevented a public tour of the building at completion.)

Click on the links for more information about career and college pathways information for [sustainable agriculture](#) and [sustainable design](#). Construction project archives may be found at: <https://www.hsd.k12.or.us/Domain/1135>.

The media is invited to this community event.
