

UNIDENTIFIED REMAINS HELP RETURN HIM TO FAMILY

Sex: Male
Age: 35-65 (estimated)
Body Mass: Unknown
(Shown at BMI 22)
Height: 5'5" (estimated)
Ancestry: Central Mexico
(likely from the area near
Las Ranas, Michoacan)

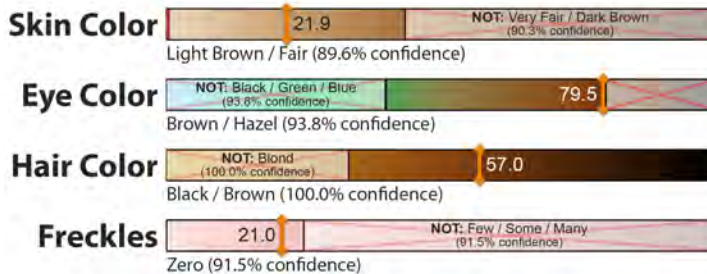

Circumstances:

In July 2016 the body of an adult male was found deceased in Salem, Oregon, USA. He could not be identified.

Using DNA evidence, trait predictions were made. The composite image depicts what he may have looked like and **is not an exact replica of appearance.**

Based on a genealogical analysis of his DNA, this individual is very likely to have close family in or near **Las Ranas, Michoacan.**

Do you have a family member or friend missing since at least 2016?
